Ravjani Hasanain Raza

FULL STACK DEVELOPER | C# | ASP.NET CORE | REACT.JS | NODE.JS

Ankleshwar, Gujarat, India • +91 9409265580 • ravjanihasanain@gmail.com • linkedin.com/in/ravjani-hasanain-raza • github.com/ravjanihasanain-raza

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in web application development across C# / ASP.NET Core and JavaScript stacks (React.js, Node.js, Express.js). Built and tested RESTful APIs with Entity Framework Core and JWT Authentication during a full stack internship, and delivered an ERP billing application, a real-time car rental booking platform, and a PHP e-commerce website. Comfortable across frontend and backend, with SQL Server, MySQL, MongoDB, and Firebase Firestore.

EDUCATION

Bachelor of Computer Applications (BCA) – M.K. Institute of Computer Studies, Veer Narmad South Gujarat University • 2023 – 2026

TECHNICAL SKILLS

Languages: C#, JavaScript, SQL, PHP, Python

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: ASP.NET Core, Node.js, Express.js, REST APIs

Databases: SQL Server, MySQL, MongoDB, Firebase Firestore

Architecture & Concepts: Entity Framework Core, JWT Authentication, CRUD Operations, Repository Pattern, Service Layer Architecture, API Integration, Authentication, Authorization, Exception Handling, Request Validation

Tools: Git, GitHub, Postman, Visual Studio

AI-Assisted Development: GitHub Copilot, ChatGPT, Claude AI, Prompt Engineering

EXPERIENCE

Full Stack Development Intern | Nightfox Technologies

Dec 2025 – April 2026

C# · ASP.NET Core Web API · Entity Framework Core · SQL Server · JWT Authentication · Postman

- Developed RESTful APIs using C# and ASP.NET Core Web API with Entity Framework Core and SQL Server for database design, relational data management, and CRUD operations.
- Implemented API routing, database relationships, and structured exception handling across multiple endpoints.
- Applied JWT Authentication, authorization, and request validation to secure API routes.
- Used Repository Pattern and Service Layer Architecture to enforce separation of concerns and improve maintainability.
- Tested all API endpoints with Postman and contributed to frontend integration using Visual Studio and Git.

PROJECTS

Bill Master – SaaS ERP Billing Software

Stack: C#, ASP.NET Core Web API, React.js, SQL Server, Entity Framework Core, JWT

- Developed a centralized ERP billing and inventory management system for Abson Energy Pvt Ltd to digitize billing, sales, purchases, inventory, and payment workflows, reducing manual work and improving data accuracy.
- Built invoice, product, vendor, client, stock, purchase, sales, and payment modules with RESTful APIs, CRUD operations, and a structured SQL Server database using Entity Framework Core.
- Implemented JWT-based authentication and integrated APIs with a responsive React.js admin dashboard, providing business insights for sales, purchases, and pending payments.

Car Rental Booking Platform

Stack: React.js, Node.js, Express.js, Firebase Firestore, JavaScript

- Developed a full-stack car rental booking platform to simplify vehicle booking and management through a centralized web application.
- Built separate user and admin modules with authentication, date/time slot selection, booking management, and booking history using React.js, Node.js, and Express.js.
- Integrated Firebase Firestore for real-time data synchronization and developed a responsive interface optimized for desktop and mobile devices.

Man's Look – E-Commerce Website

Stack: PHP, MySQL, HTML5, CSS3, Bootstrap

- Developed a PHP-based e-commerce website with product listings, user authentication, cart management, and an admin panel for managing products and users.
- Implemented CRUD operations with MySQL and built a responsive Bootstrap frontend for a seamless shopping experience across desktop and mobile devices.

BigMart Sales Analysis

Stack: Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed exploratory data analysis on a retail sales dataset, handling missing values and identifying sales patterns.
- Created heatmaps, histograms, and boxplots to analyze product attribute and outlet performance.
